-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Information Disclosure Statement

Many of the foreign patents listed on the information disclosure statement were not found with the application and applicant is requested to submit the missing references such that they can be considered. As noted on the form 1449, the missing references have not initialed.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Kutz (US 5,749,690). Kutz discloses an unfastening prevention device comprising a cap (16)

having a groove (26) and a widening part (referred to as 27) increasing the inner diameter of the cap towards an open end; a spring (15) received in a restriction means (14) wherein the spring means can slide along the widening part to engage the groove (column 2, lines 37-43). The cap is not provided with a plurality of holes.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kutz as applied to claim 1. In regards to claim 3, the "first elastic band" is an obvious duplication of parts since it is unnecessary because the spring means does not require the additional elastic band to operate properly.

Claims 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kutz as applied to claim 1 and further in view of D'Adamo (US 5,752,795). D'Adamo discloses a second elastic body (38, see Figs. 2 and 3) between the cap and fastener. At the time the invention was made, it would have been obvious for one of ordinary skill in the art to provide the device of Kutz with the second elastic body as disclosed in D'Adamo in order to protect the fastener from corrosion as discussed therein.

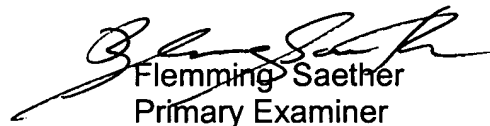

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
